Winkler, H.
EXTENT OF PROTECTION OF CHEMICAL PAT-
ENTS FROM THE VIEWPOINT OF THE INFRINGE-
MENT JUDGE. [1958] 3p. 45 refs.
Order from SLA ml53.00, ph56.30 61-10446

Trans. of Angewandte Chemie (West Germany) 1958,
v. 70, no. 5, p. 117-123.

In Germany, patent protection extends beyond that which is directly stated in the patent claims. This broadened protection of the inventor, however, leads to a certain ambiguity regarding rights. The concepts, "subject matter of the invention", "state of the art", "poorer performance", and the "general idea of the invention" are therefore defined more accurately here, in juxtaposition to each other. By means of examples it is shown how the interests of the inventor and the patent plaintiff are to be bounded and according to what principles the extent of patent protection is set up by the courts in the infringement action. (Author) (Pre-
(Social Sciences, TT, v. 5, no. 7) (over)
